EDUCATION

B.S. Computer Science, East Carolina University **Expected May 2027**

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL
Frameworks: React, Next.js, Node.js, Express, Tailwind CSS
Databases/ORM: PostgreSQL, MongoDB, Prisma, Drizzle, pgvector
Tools: Git, Docker, AWS, REST APIs, JWT, Vercel

EXPERIENCE

Software Developer (Contract) - Al-Hamd Printers **2026-Present**

- Building a full-stack management system for PVC manufacturing operations covering order processing, inventory, workflow automation, payroll/expense tracking, customer records, and financial reporting.
- Designing backend data models and API layers to support admin dashboards and day-to-day operational workflows.
- Translating manual business processes into structured software systems for a real operating business.

Freelance SEO & Data Consultant - Fiverr **2020-2023**

- Analyzed client performance data and delivered optimization recommendations for international businesses.
- Created structured reports that translated raw metrics into clear, action-oriented insights for non-technical stakeholders.

PROJECTS

Supo - Multi-Tenant Support Platform

- Built a full-stack support platform with an embeddable chat widget, human escalation flow, shared inbox, knowledge ingestion, and admin analytics.
- Used Next.js, TypeScript, Neon Postgres, Drizzle, Redis, and Gemini-based retrieval workflows to support product-scoped support operations.

Context Compiler - Semantic Code Search Platform

- Built a platform that indexes GitHub repositories into a vector store for natural-language search, repository Q&A with citations, and reusable prompt-context packs.
- Implemented a Next.js frontend with a Python FastAPI indexing service, Supabase/PostgreSQL, Prisma, and pgvector.

The CrowsNest - 1st Place, ECU Spark Hackathon

- Built an AI-powered student hub in a team hackathon setting, allowing ECU students to upload and view course-related documents for class-specific use.
- Used Next.js, TypeScript, Tailwind CSS, DynamoDB, NextAuth, and AWS services to deliver a polished working product under a 48-hour deadline.
